01 PROFILE

Results-driven Software Engineer with over 4 years of experience specializing in scalable system development and team leadership. Expert in HTML, CSS, JavaScript, React, and Node.js, with proficiency in Angular and Next.js. Successfully implemented CI/CD pipelines and AWS integrations, driving impactful software solutions. Known for mentoring engineers, enhancing productivity, and leveraging technology to deliver high-quality, maintainable systems. Passionate about continuous improvement and innovation in software engineering.

02 EMPLOYMENT HISTORY

Oct 2025 — Present

Da Nang, Viet Nam

Medior Software Engineer at Avepoint

- Collaborate with a global team to design, develop, and maintain SaaS web applications in the education domain (Singapore).
- Focus on front-end optimization, improving website performance, load speed, and user experience.
- Implement best practices in React, component architecture, and responsive layouts.
- Participate in code reviews, knowledge sharing, and cross-functional discussions to ensure high-quality deliverables.
- Contribute to international projects, aligning with team standards and global product requirements.

Jul 2025 — Aug 2025

Freelancer at Upwork

- Delivered multiple web projects for international clients on Upwork.
- Built a user tool using JavaScript and optimized performance.
- Communicated directly with clients, clarified requirements, estimated tasks, and delivered on schedule.
- Maintained high client satisfaction and long-term collaborations.

Jan 2024 — Sept 2025

Medior Software Engineer at Datahouse Asia

- Collaborate with cross-functional teams to develop and maintain scalable web applications in the tax and healthcare domains.
- Ensure compliance with HIPAA and HL7 standards for handling sensitive healthcare and tax data.
- Implement responsive, accessible, and high-performance UIs using modern technologies (React, Next.js).
- Optimize web applications for speed, usability, and reliability while adhering to government and industry regulations.
- Participate in code reviews, knowledge sharing, and mentoring, maintaining high code quality and team efficiency.
- Integrate frontend with secure backend APIs, ensuring data integrity and system reliability.

Junior Software Engineer at DataHouse Asia

Jan 2022 — Dec 2023

- Collaborate with a global/government team, assisting in frontend optimization and responsive UI implementation.
- Learn and apply React, Next.js, and modern web technologies on real projects.
- Participate in code reviews and team knowledge sharing, gaining hands-on experience in secure and high-performance applications.
